

Approved to UL standards by CSA

approx. 36.5kg (80lb)

The 14 is an articulated, seamed cast glass sphere with a frosted cylindrical void that houses either a low voltage (12V, 10W halogen/xenon) or LED(12V, 0.3W) lamp. Individual pendants are visually quite subtle, but gain tremendous strength when multiplied and clustered in large groups. Light interacts with the bubbles and imperfections of the cast glass to produce a glow reminiscent of small candles floating within spheres of water. Cast glass is an organic process, imperfect by nature and each 14 is hand made; thus, every piece produced is unique.

APPLICATIONS

Suitable for residential and commercial use. CSA, CE approved; approved to UL standards by CSA. Popular applications to date include clusters over tables in residential dining rooms and restaurants, accessory lighting in living rooms, decorative lighting, linear configurations or clusters over bars and kitchen islands, and large chandeliers in building lobbies and other public spaces.

MATERIALS

Cast glass, blown borosilicate glass, braided metal coaxial cable, electrical components and a matte white powder coated canopy.

Note: Longest and shortest lengths may have a variance of $\pm 50\text{mm}$ (2")

Note: As an alternative to a built-in transformer, Bocci recommends mounting transformers remotely in an easily accessible and hidden location for ease of long-term maintenance.

Purchase online for replacement lamps at www.bocci.ca/lamps

Worldwide patents issued and pending. US patent # 06556,361
Made in Vancouver, Canada
